*Fabienne Monté – breeder Toscana®*

## *The Toscana® breeding program*

In breeding, we focus on plant quality, easy cultivation, outdoor performance and of course a beautiful palette of flower colours.

Breeding is a long process which requires dedication, expertise and eye for detail from our breeders.

Our breeding program offers added value right along the chain, from grower to consumer. Drawing on feedback from growers and a continuous innovation process, we strive to further improve the quality of the different varieties and to expand the Toscana® series.

In the Galaxy series we have replaced the White. The improved one has more plant volume and therefore fits better in our most voluminous Zonal line. In our important Dolce Vita series we have improved the Karen and Evi. Both varieties have a compacter and more round plant habit in line with the series.

A new introduction in this line is the Dolce Vita Helene pink with eye. This variety might replace the Claudio in the coming years.

The Castello series has been upgraded by adding Robiene ruby red.

This variety stands out by its nice round habit and dark red flower colour. The upcoming Moonflair peltatum series has been updated by introducing improved versions of the Moonflair Burgundy and Moonflair Red. Again to bring these varieties more in line with the series.

### About the Toscana® production

Toscana® is available as unrooted cuttings (URC) and as young plants. At our production locations in Ethiopia and Kenya we specialize in the URC production of Pelargonium. With a total of 37 hectares of well-equipped greenhouses, which are run by qualified and experienced staff, we supply from both locations a high production standard. This gives you the best quality against the lowest risk in supply change.

Moreover, we think and act sustainably. Our production locations are MPS-A certified (Environmental Programme for Ornamental Horticulture), covering crop protection products, fertilisers, energy, water and waste. Neonicotinoids are banned and to combat the negative effects of crop protection products, we use organic variants and work with Integrated Pest Management (IPM) wherever possible.

For orders that are directly delivered and/or invoiced by suppliers for which Florensis or its partners act as brokers, the General Conditions of that supplier apply.

Toscana® are varieties protected by the breeder's rights of Toscana® breeding. We are obliged to request a license for these varieties. Multiplication of any kind of these varieties is forbidden. Any cuttings or plants we supply can only be for growing on to finished plants.

## *La Dolce Vita*

It's the small things that make life beautiful:  
a glass of red wine in the sunset,  
a cappuccino in bed or  
a terrace full of outstanding pelargonias.
